

Can you spot the

SIGNS & SYMPTOMS

of a vision problem
in your child?

Parent Checklist:

- Tilting the head or squinting when trying to focus
- Closing or covering one eye when reading or watching TV
- Rubbing the eyes frequently
- Experiencing light sensitivity and/or excessive eye watering
- Holding reading materials, like a book or digital device, too close to the face
- Sitting too close to the TV
- Using a finger as a guide while reading, or frequently losing their place while reading
